

# CARE AND CLEANING

## Recommended Methods

THOMPSON

### GENERAL INSTRUCTIONS FOR ALL PRODUCTS

- Never use abrasive cleaners or scrub pads
- Wipe with a soft cloth to limit spotting
- Avoid contact with hot pots – allow them to cool
- For daily cleaning use mild soap and water
- Do not allow drain cleaners to contact the surface
- Remove food and dishes quickly

#### CARE FOR LIVING FINISHES WITH PATINA

- The above finishes come with existing patina.
- To maintain these finishes, do not use harsh cleaners, bleach, or metal cleaners as these will remove the patina and bring the copper back to a bright, shiny state.
- If bright spots appear, wipe with soap and a soft cloth and the spots will “heal” over time and blend back into the finish.

#### CARE FOR LIVING FINISHES WITHOUT PATINA

- The above finishes come without existing patina.
- If you wish to keep these finishes in their existing state, you can use a copper or brass cleaner to polish the metal back to its like new condition. We recommend Wright's Copper Cream.
- To slow patina, you can apply a high-grade carnauba wax after cleaning. We recommend Flitz Wax.
- If you wish your product to patina with use, simply use mild soap and water to clean it and over time it will develop a beautiful patina.

#### CARE FOR LIFETIME FINISHES

- The above finishes are lifetime finishes and will not change over time.
- To maintain these finishes, do not use harsh cleaners, bleach, or abrasive pads as these will damage the clear coating.
- Use a soft cloth and a mild soap to clean and maintain the finish.
