

STOCK POWDER GUIDE

The Complete Color Collection

SHERWIN-WILLIAMS®

oem.sherwin-williams.com

Sherwin-Williams
Powdura[®] powder
coatings offer
the breadth and
flexibility needed
for your finishing
operation.

This guide encompasses a wide variety of powder technologies, colors, glosses and finishes. With the benefits of the largest distribution platform in the industry and a commitment to providing services and custom powder solutions, Sherwin-Williams is your total finishing solution.

All powder products listed in this guide are in stock and readily available to help you keep your operations in motion.

Sample panels are available for all products shown and can be requested through a local **SALES REPRESENTATIVE** or **FACILITY**.

Product Information

EPOXY

Epoxy powder coatings are the technology of choice for high-performance applications, and Powdura Epoxy Coatings will meet or exceed most performance expectations. These coatings combine outstanding salt spray resistance and excellent chemical performance with exceptional film hardness. Our epoxy coatings are often selected for functional or corrosion-inhibiting applications, such as industrial equipment, under-hood automotive, pipe coatings or primers. In addition to outstanding performance, finishers can also benefit from a wide range of cure capabilities.

HYBRID

When you desire the mechanical film properties of an epoxy, but prefer the overbake stability of a polyester, hybrid technology is an excellent solution. Powdura Hybrid Powder Coatings offer exceptional transfer efficiency — giving you the ability to completely cover and protect many hard-to-coat parts. As the proven choice for many finishers, common end uses for these coatings include metal office furniture, store fixtures, electronic cabinetry and racking.

POLYESTER URETHANE

Powdura polyester urethane coatings provide a finish that lasts. Combining exceptional resistance to weathering and UV light with a unique high-definition finish, these coatings are an excellent choice for finishing lawn and garden equipment, outdoor furniture, electronic enclosures and automotive components.

TGIC AND TGIC-FREE POLYESTER

Powdura polyester coatings are the optimal choice when versatility is critical, providing coating solutions for a wide range of applications and finishers. Available in TGIC and TGIC-free formulations, these solutions combine excellent color and gloss retention with great overbake stability and high-quality mechanical properties — making them ideal for various applications, including electronic cabinetry, case goods, fencing, metal building products, lighting, furniture and heavy equipment.

Product Code System

1ST LETTER: Chemistry Type	2ND LETTER: Color	3RD LETTER: Appearance	4TH DIGIT: Gloss (60°)
D: Super Durable Polyester TGIC	A: Gray	B: Spice/Blend	0: Not Applicable

V: 4000 Polyester TGIC-free	R: Red/Violet	W: Wrinkle	9: 90+
	S: Silver	Z: Bonded Aluminum Flake	
	W: White		
	Y: Yellow		

*Additional Powdura products and technologies include super durable polyesters; super durable urethanes; special effects, such as spice and metallics; mil-spec approvals; and coatings that meet AAMA specifications 2603, 2604, and 2605. If you're looking for products formulated to meet the performance standards of the National Sanitation Foundation (NSF) International organization or those approved by Underwriters Laboratories (UL), contact your local Sales Representative for help selecting the optimal coating to meet your requirements.

Program Information

NATIONAL PROGRAMS

Powdura

This collection of 200+ in-stock products includes something for every shop. Powdura coatings offer a wide assortment of in-stock colors and textures, as well as special effect finishes and custom colors available.

RAL

Our Powdura® RAL Series offers exceptional weatherability and super durable TGIC-free polyester powder coatings available in 75 colors in high gloss and satin sheens. They are formulated for outstanding weatherability compared to standard polyester powder coatings, and the products on this card are designed to meet the requirements of American Architectural Manufacturers Associations (AAMA) 2603-02 standards. Sherwin-Williams liquid coatings can also be custom ordered in many RAL colors to provide a wide range of coating solutions for a variety of substrates requiring both liquid and powder finishes.

REGIONAL PROGRAMS

When you need to find the right color quickly, look no further than our lineup of in-stock powders. The products presented in these collections are available to all U.S. and Canada and feature the most popular colors in that region, stocked for fast and convenient delivery. Our regional programs include Canada and U.S. Eastern and Western states.

ARCHITECTURAL PROGRAMS

Designed to provide substantial resistance to abrasion, impacts, scuffing and scratching, Powdura® 4000 coatings deliver a superb finish and long-term durability. This proven technology withstands the harsh elements from UV rays to high heat and humidity. Powdura 4000 coatings are designed to meet or exceed AAMA 2604 specifications, giving your structure's metal products excellent gloss retention and weathering resistance.

This coating system is available in TGIC and TGIC-Free formulations. Applications include: residential and non-monumental, heavy commercial use for windows, doors, fencing, railings, stairwells, handrails, louvers, skylights, indoor atrium areas, high traffic areas and storefronts.

4000 ANODITE

Our Anodite series is a collection of 12 colors designed to look like anodized metal surfaces while delivering a smooth, ultra-matte, powder-coated finish. With a range of attractive shades, this system has built-in, super durable TGIC-free technology for long-term resistance against the weather. These coatings can be repaired, applied to more than aluminum, and have greater color consistency between parts. Designed to meet AAMA 2604 specifications, Powdura 4000 coatings can be applied in one coat with no clearcoat.

CLEARCOAT

Clear topcoats are typically used as an added layer of protection. Clear topcoats are commonly applied over powders with Aluminum or Mica, and are used to inhibit premature gloss and/or color changes. Testing is recommended to confirm acceptability.

FIND YOUR FINISH?

Sample panels are available for all products shown and can be requested through a local **SALES REPRESENTATIVE** or **FACILITY**.

At Sherwin-Williams, we think about coatings differently, continuously seeking the perfect solution to help your products win over your customers. Whether you need the most rugged and protective coating, a technical expert to provide answers and hands-on support, consistently perfect color at just the right gloss, or a custom solution created just for you – we are here to help. We are Sherwin-Williams General Industrial Coatings, and we are obsessed with giving you the competitive edge.
